	SubQuestion No: 7		
Q.7	What has been developed by Dr Rajagopalan Vasudevan, professor College of Engineering in Madurai?	r at Thiagarajar	
Ans	1. method for using plastic for road construction		
	leph 2. method for using plastic to make tiles and blocks		
	leph 3. method for extracting raw material for chemicals		
	4. method for making diesel from plastic waste		
		Question ID : 685582201	
		Status : <b>Answered</b> Chosen Option : <b>1</b>	
	Comprehension:		
	Read the following passage and answer the questions given after it.		
	around 4,300 elephants. Of this, about 60% gets recycled, according to t environment ministry. The rest gets dumped in landfills, clogs drains, goe micro-plastics, or is burnt, leading to air pollution. In the absence of a proper waste management system, the plastics that dirty, which makes the re-cycling process water-intensive and expensive "It is the process of cleaning the plastics before recycling that makes it re lot of water is required to wash the collected plastics, especially if it is oil to be cleaned with a solvent," said Dr Suneel Pandey, director of environ management, The Energy and Resources Institute (TERI). Experts say proper waste collection and management is at the core of er get recycled instead of ending up in landfills and oceans. Researchers from various institutes have come up with innovative ways waste that cannot be recycled further or are unrecyclable. At IIT Delhi, a group of chemical engineers are working on chemically br to its smaller hydrocarbon molecules and then synthesising diesel out of packaging material, Polyethylene terephthalate (PET) bottles, polystyren packaging. The fuel produced can currently be used as a blend in stationary diesel r generators and needs further testing and standardisation to be used as of vehicles. A mix of plastic and stone has been used to create a block that can be u CSIR laboratory also used shredded plastics, chemically treated it and r make tiles. A German chemical producer called BASF is also breaking down waste raw material for chemicals, instead of using material derived from fossii f One cost-effective solution was developed by Dr Rajagopalan Vasudeva Thiagarajar College of Engineering in Madurai. The National Highways A currently scaling up his technology to use plastic waste in making roads. He came up with the idea of mixing plastic waste with Bitumen used for 2001. "That year the Tamil Nadu government had planned to ban plastic began with the more than 1 lakh people employed by the industry. Since from petroleum just like Bitumen, 1 th	es into the ocean as get recycled are often source intensive. A y or greasy as it has ment and waste nsuring more plastics to utilise the plastic eaking down plastics it. The process uses he, and multi-layer machines like commercial diesel in ised in flooring. A nixed with fillers to plastic and using it as fuels. In, professor at Authority of India is constructing roads in and my concern plastic is derived on. The result, not dier," he said. The astics can be used in	
	The construction of every kilometre of road required nine tonnes of Bitumen and one tonne of plastic waste. This means for every kilometre of road, one-tonne Bitumen is saved, which costs about ₹30,000.		
	SubQuestion No : 8		
Q.8	The above passage mainly talks about		
Ans			
	2. putting the plastic waste to use by recycling.		
	X 3. the need of research to manage plastic waste.		
	<ul> <li>A the plastic waste generated in India.</li> </ul>
