## Reasoning Quiz

1. In each of the questions below are given some statements followed by some conclusions numbered I and II. You have to take the given statements to be true even if they seem to be at variance from commonly known facts. Read all the conclusions and then decide which of the given conclusions logically follows from the given statements. Statements:
All phones are vehicles
Some vehicles are rivers
No river is a bike
Some bikes are cars
Conclusions:
I. Some phones are rivers
II. Some cars are rivers

Only I follows
O Either I or II follows
Only II follows
O None follows
O Both follows
2. In each of the questions below are given some statements followed by some conclusions numbered I and II. You have to take the given statements to be true even if they seem to be at variance from commonly known facts. Read all the conclusions and then decide which of the given conclusions logically follows from the given statements.
Statements:
All pencils are pens
All pens are bags
Some bags are books
Conclusions:
I. All pencils are bags
II. Some pen being book is a possibility

O Either I or II follows
Only II follows
O Both follows
Only I follows
None follows
3. In each of the questions below are given some statements followed by some conclusions numbered I and II. You have to take the given statements to be true even if they seem to be at variance from commonly known facts. Read all the conclusions and then decide which of the given conclusions logically follows from the given statements. Statements:
Some calculators are phones

All phones are laptops
No laptop is a key
No key is a keyboard
Conclusions:
I. Some keys are calculators
II. No laptop being a key is a possibility

Only II follows
O Both follows
O None follows
Only I follows
O None of these
4. In each of the questions below are given some statements followed by some conclusions numbered I, II, and III. You have to take the given statements to be true even if they seem to be at variance from commonly known facts. Read all the conclusions and then decide which of the given conclusions logically follows from the given statements.
Statements:
Some balls are bats
Some bats are stumps
No stump is a ground
All grounds are stadiums
Conclusions:
I. Some balls are stumps
II. Some stumps are stadiums
III. No ball being stadium is a possibility

Only I and II follows
Only III follows
O Only II follows
None follows
O Either I or II and III follows
5. In each of the questions below are given some statements followed by some conclusions numbered I, II, and III. You have to take the given statements to be true even if they seem to be at variance from commonly known facts. Read all the conclusions and then decide which of the given conclusions logically follows from the given statements.
Statements:
Some beds are chairs
Some chairs are doors
No door is a window
Some windows are homes

Conclusions:
I. No bed is a door being a possibility
II. Some beds are doors
III. Some chairs are not beds

O Only II and III follows
Only III follows
O Only I follows
O None follows
O Only I and II follows
6. In each of the questions below are given some statements followed by some conclusions numbered I, II, and III. You have to take the given statements to be true even if they seem to be at variance from commonly known facts. Read all the conclusions and then decide which of the given conclusions logically follows from the given statements.
Statements:
All cats are animals
Some animals are mammals
Some mammals are humans
No human is a animal
Conclusions:
I. Some cats are humans
II. Some mammals are cats
III. Some animals are mammals

O Only I follows
O Either II or III and I follows
O None follows
O Only II follows
O None of these
7. In each of these questions two conclusions have been given followed by possible statements. You have to take the given conclusions to be true even if they seem to be at variance with the commonly known facts and then decide that the conclusions logically follows for which of the given statements disregarding commonly known facts. Conclusions:
I. Some chains are cars
II. Some rings being cars is a possibility

Some rings are chains. Some chains are shirts. All shirts are cars
O No ring is a chain. Some chains are shirts. Some shirts are cars
O All rings are chains. Some chains are shirts. Some shirts are cars
None of these
All rings are chains. All chains are shirts. All shirts are cars
8. In each of these questions two conclusions have been given followed by possible statements. You have to take the given conclusions to be true even if they seem to be at variance with the commonly known facts and then decide that the conclusions logically follows for which of the given statements disregarding commonly known facts.
Conclusions:
I. No bike is a car
II. Some cars are roads

Some bikes are roads. All roads are planes. No plane is a car.
Some bikes are roads. All roads are planes. Some planes are cars.
O None of these
All bikes are roads. All roads are planes. No plane is a car.
All bikes are roads. All roads are planes. Some planes are cars.
9. In each of these questions two conclusions have been given followed by possible statements. You have to take the given conclusions to be true even if they seem to be at variance with the commonly known facts and then decide that the conclusions logically follows for which of the given statements disregarding commonly known facts.
Conclusions:
I. All trains are villages
II. Some trains are homes

All homes are villages. All villages are bungalows. All bungalows are trains.
O Some homes are villages. All villages are bungalows. All bungalows are trains.
No home is a village. Some villages are bungalows. All bungalows are trains.
O None of these
O Some homes are villages. Some villages are bungalows. All bungalows are trains.
10. In each question below are given some statements followed by some conclusions. You have to take the given statements to be true even if they seem to be at variance with commonly known facts. Read all the conclusions and then decide which of the given conclusions logically follows/follow from the given statements, disregarding commonly known facts.
Statements:
Some red is yellow
No yellow is blue
All blue is white
Some white is green
Conclusions:
I. Some red is green
II. Some green being blue is a possibility

Only I follows
O Either I or II follows
O Only II follows
O None follows
