4. Which of the followings organisation has lunched "Project NETRA"?

A DRDO

B ISRO

C CSIR

D HAL

E None of these

Solution

- Project NETRA is an initiative by the Indian Space Research Organisation (ISRO) which is an early warning system in space to detect debris and hazards to the Indian satellites.
- This project will help ISRO safeguard the Indian satellites in space and is estimated to cost approximately Rs. 400 crores.
- The project holds a deep significance in terms of space program and given below are the major points of importance of this Project NETRA:
 - With the help of telescopes, radars, data processing units, etc., the researchers and scientists will be able to spot and track objects as

small as 10 cm, up to a range of 3,400 km and equal to a space orbit of around 2,000 km.

- It aims at capturing the geostationary orbit (GEO), which is closely 36000 km away and is the point where the communication satellites operate.
- With this project, India aims at gaining its own capability of Space Situational Awareness (SSA). This accomplishment will help ISRO predict any harm or thread that may affect Indian satellites in space.
- This project will bring India at an equal platform with the other International space agencies which have already been tracking their satellites to protect them from debris and hazards.
- The functional Indian satellites on GEO and LEO orbits can easily be kept safe and secure with the help of this project.

5. In which of the following country the Khalifa International Stadium is located?
