

# MEP DRAFTSMAN COURSE

# What is MEP Drafting?

MEP drafting involves creating detailed technical drawings (using CAD software) and plans for mechanical, electrical, and plumbing (MEP) systems in buildings. MEP design considers factors such as energy efficiency, safety, and functionality while creating accurate and precise drawings.

MEP drafters create drawings that outline the layout, dimensions, materials, and installation details of HVAC systems, electrical systems, plumbing systems, and more. These drawings serve as a guide for contractors and installers during construction, helping to minimize errors and conflicts. Accurate MEP drawings ensure that the systems are properly coordinated with each other and fit within the building's structural constraints.

## Career Options after the Course

- Electrical Draftsman
- Mechanical Draftsman
- HVAC Draftsman
- Coordination Draftsman
- Drafter / Overseer in Kerala Govt.
- Junior Engineer
- Tendering Dept. Quantity Take off Drafter

## **MEP: Gold Plan**

- 40 Hour of recorded classes
- Site visit in Middle East / India
- Live projects from the middle east
- 3 live classes in a week
- 6-month mentorship
- Certification
- Personal mentorship
- Whatsapp group for doubt clearance
- Placement assistance

# Faculties

## Babu Devasyakutty

(Locations - UAE & India)

**Exp:** 20+ years of experience delivering projects from across UAE, Qatar, Saudi Arabia, USA & India.

**Past Employers:** Eastern International LLC - UAE, AMANA - UAE.

## Rakesh M

(Locations - UAE & India)

**Exp:** MEP professional with 15+ years of experience delivering projects from across UAE, Egypt, Qatar & Saudi Arabia, USA & India.

**Past Employers:** Etisalat - UAE, Meydan - UAE.

## Saimon KS

(Locations - UAE & India)

**Exp:** MEP professional with 15+ years of experience delivering projects from across UAE, Qatar & Saudi Arabia & India.

**Past Employers:** Trojan - UAE, Altorath International Consultancy - UAE.
