If mobility takes place within a closed group, it embodies that synthesis of nearness and distance which constitutes the formal position of the stranger. Although in more intimate relations, he may develop all kinds of charm and significance, as long as he is considered a stranger in the eyes of the other, he is not an "owner of soil." Restriction to intermediary trade, and often (as though sublimated from it) to pure finance, gives him the specific character of mobility. If mobility takes place within a closed group, it embodies that synthesis of nearness and distance which constitutes the formal position of the stranger. For, the fundamentally mobile person comes in contact, at one time or another, with every individual, but is not organically connected, through established ties of kinship, locality, and occupation, with any single one.</p> <p>What assumptions can be made about the stranger from the passage above?</p>

<p>Q.63</p>	<p>Read the passage below from Wittgenstein’s <i>Philosophical Investigations</i> carefully and answer the question.</p> <p>I can think of no better expression to characterize these similarities than “family resemblances”; for the various resemblances between members of a family – build, features, colour of eyes, gait, temperament, and so on and so forth – overlap and crisscross in the same way. – And I shall say: ‘games’ form a family.</p> <p>And likewise the kinds of number, for example, form a family. Why do we call something a “number”? Well, perhaps because it has a – direct – affinity with several things that have hitherto been called “number”; and this can be said to give it an indirect affinity with other things that we also call “numbers.” And we extend our concept of number, as in spinning a thread we twist fibre on fibre. And the strength of the thread resides not in the fact that some one fibre runs through its whole length but in the overlapping of many fibres.</p> <p>But if someone wanted to say, “So there is something common to all these constructions – namely, the disjunction of all their common properties” – I’d reply: Now you are only playing with a word. One might as well say, “There is a Something that runs through the whole thread – namely, the continuous overlapping of these “fibres.”</p> <p style="text-align: right;">- Ludwig Wittgenstein, <i>Philosophical Investigations</i>, Investigation No. 67</p> <p>Which of the following statement[s] does Wittgenstein imply in the above passage?</p>
(A)	The one fibre supposed to run through the length of the thread corresponds to what is supposed to be common to all numbers
(B)	The overlapping of the fibres corresponds to the family resemblance Wittgenstein is trying to explicate
(C)	It is absurd to insist that there is one thing common to all the members of the family

(B)	With 7 as the starting point, we require an intuition such as 5 fingers or 5 marks on a page to reach upto 12
(C)	If $7 + 5 = 12$ were an analytic proposition it would not need any intuition to know it
(D)	We arrive at the knowledge of $7 + 5 = 12$ by imitating others adding 7 and 5

<p>Q.21</p>	<p>The stranger is by nature no "owner of soil" -- soil not only in the physical, but also in the figurative sense of a life-substance, which is fixed, if not in a point in space, at least in an ideal point of the social environment. Although in more intimate relations, he may develop all kinds of charm and significance, as long as he is considered a stranger in the eyes of the other, he is not an "owner of soil." Restriction to intermediary trade, and often (as though sublimated from it) to pure finance, gives him the specific character of mobility. If mobility takes place within a closed group, it embodies that synthesis of nearness and distance which constitutes the formal position of the stranger. For, the fundamentally mobile person comes in contact, at one time or another, with every individual, but is not organically connected, through established ties of kinship, locality, and occupation, with any single one.</p> <p>What assumptions can be made about the stranger from the passage above?</p>
