Python Programming

I joined Entri's Python course after completing my engineering. It is helping me a lot to learn a new language and has made me more confident in this field. The classes are so well-structured that everything is easy to understand. If we have any doubts, we can ask immediately on Slack and get a quick response. The mentors are very helpful. I'm really happy that I chose this course

► **Viswapriya T** ►
Python Programming

I was searching for a good platform to learn Python in a structured and advanced way when I came across an ad on social media. I decided to contact the number provided, and the person who answered the call was very kind and patiently explained all the details about the Python programming course. Later, the course coordinator reached out to me and shared more information. I was truly impressed by her kindness. She always cleared my doubts without hesitation and treated me with genuine respect.

My mentor also made a big impact. His classes were never boring thanks to his engaging teaching style. He explained every concept clearly and gave us many useful tasks that deepened my understanding. I truly love this platform and feel grateful for the learning experience it has given me.

Full Stack Web Development

I'm really happy to share that I've officially got a job as a Software Developer. Thank you so much for your constant support, guidance, and encouragement throughout my journey at entri. Your mentorship truly made a big difference in helping me reach this milestone. Forever grateful, and I'll keep learning and growing from here!

Python Programming with Django

I am currently attending the Python course by Entri Elevate, and it has been a great learning experience so far. Our mentor, Mr. Harikrishnan, explains concepts with clear, practical examples, which makes learning easy. We also get recorded sessions, assignments, and a project that helps me practice better.

Our coordinator, Mrs. Prajitha, manages everything smoothly. She shares daily updates and supports us with any technical or personal issues. Both the mentor and coordinator are very friendly and approachable, creating a space where we feel comfortable clarifying our doubts. This class has already helped me understand Python better and improve my confidence in coding.

► **Muhammed Sajid** ►
Data Science

I am truly grateful to be a part of Entri Elevate. The learning environment here is supportive and motivating. What I appreciate most is how the program not only focuses on technical knowledge but also helps us improve our personal skills, such as communication and presentation abilities. This holistic approach has made my learning experience even more valuable.

A special thanks to my mentor, Greeshma Ma'am, for her excellent guidance, teaching, patience, and constant encouragement throughout my journey. Her way of teaching made complex topics easy to understand and inspired me to push my limits.

I would also like to thank my coordinator, Sona Ma'am, for her continuous support and guidance. Overall, my experience at Entri Elevate has been truly impressive, and I would highly recommend it to anyone who wishes to grow in coding and personal development.

AWS Solutions Architect

I worked in data backup field & was stuck with the knowledge of one technology only. To learn something that is relevant to my current working field, I looked up for cloud computing courses.

I found entri and their course related to cloud. I opted Architecting in AWS course. The course structure was good and up to date. I need to thank our Mentor Jayan sir who helped us to learn from the scratch, even though I don't have much knowledge in AWS earlier. Our course coordinator Praveena was supportive and helpful from the beginning. Whenever we had doubts, she was there for us. Thank you entri.

▶ **Karthik Nair** ▶
UI/UX design with AI

The course is well-structured and easy to follow. The mentor is knowledgeable and supportive, always ready to clear doubts. What really stands out is the way the classes are conducted — with real-time examples that make complex concepts easy to grasp. The assessments are thoughtfully designed and help reinforce learning.

The soft skills training is also a great addition. It not only helps in polishing how we present ourselves but also changes the way we think about communication and presentation. It's making a real impact beyond just technical skills. Overall, a valuable and well-rounded learning experience.

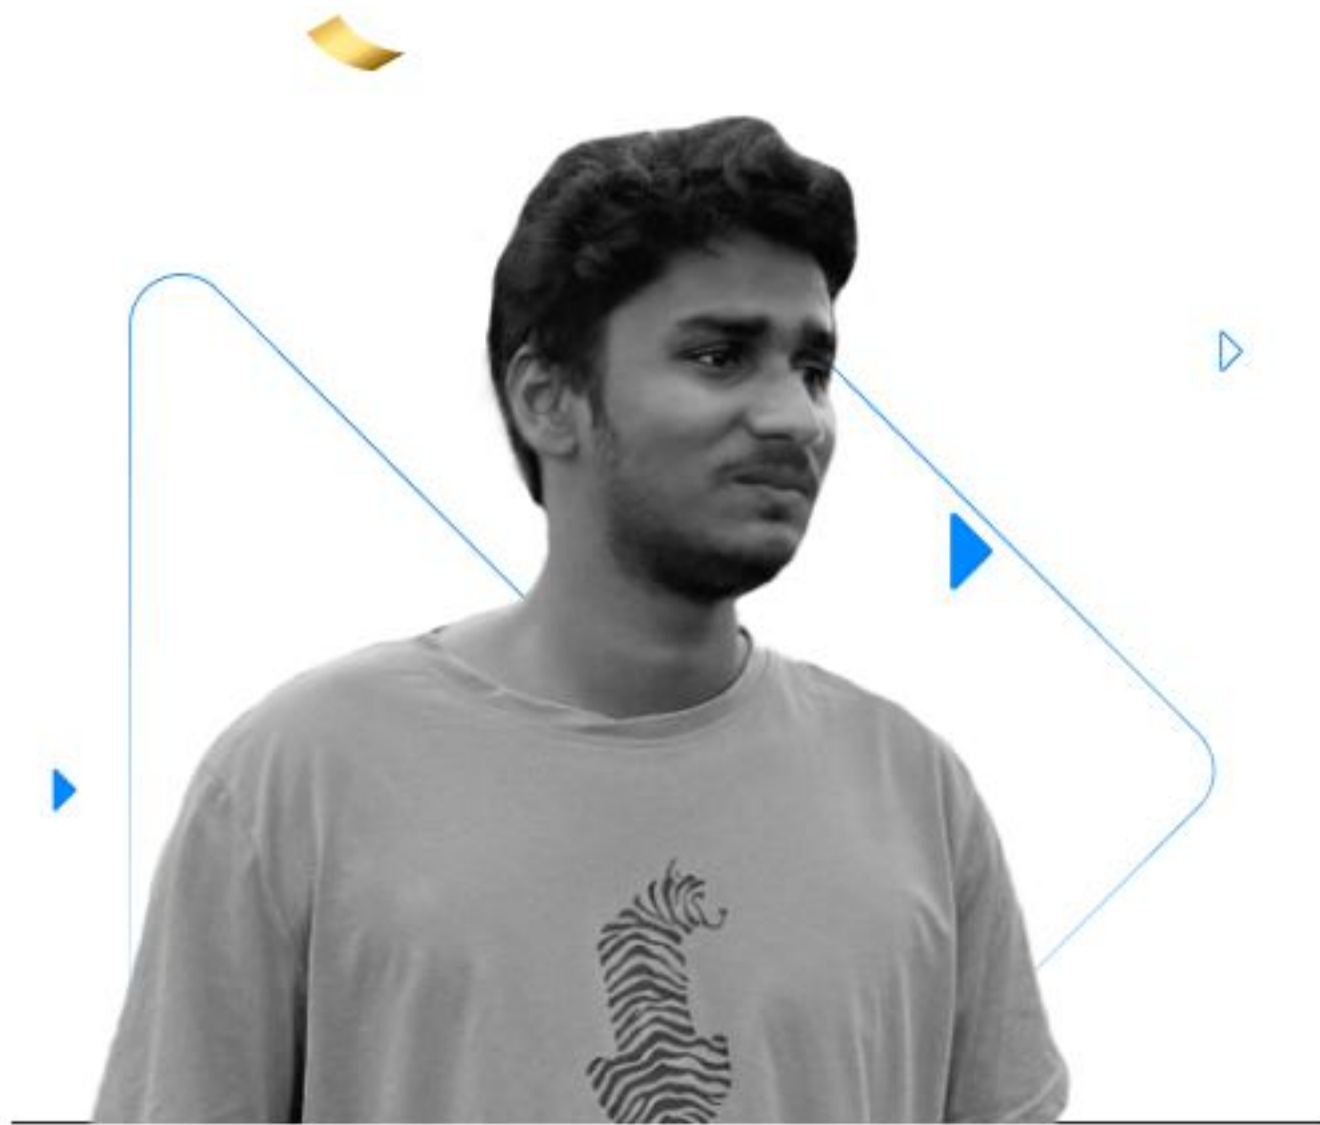

▶ **Ben Joseph** ▶
Python Programming with Django

I had a truly valuable learning experience with the Python Programming with Django course on Entri. The course was well-structured, beginner-friendly, and provided a strong foundation with the right balance of theory, real-time examples, and hands-on projects.

A heartfelt thanks to our mentor, **Bahul Hariharan**, for his clear explanations and patient teaching style. His practical approach and real-world examples made complex Django concepts easy to understand and apply.

I'm also grateful to our coordinator, Prajitha Prathap, for her constant support and for managing everything so smoothly throughout the course. Her timely updates and willingness to assist with any concerns made the learning journey seamless.

I highly recommend this course to anyone looking to start their journey in Python and Django development with structured guidance and real-world exposure.

▶ **Abhinand C** ▶
Data Science

I recently completed the Data Science and Machine Learning course from Entri App, and it was a truly enriching experience. The course was well-structured, covering key tools such as Python, SQL, Power BI, and core ML concepts, with a balanced mix of theory and hands-on practice.

A big thanks to my mentor, Anwar Rajeev, for his clear and effective teaching, and to our coordinator, Aswathy, for her constant support. This course has helped me build a strong foundation in data science and boosted my confidence for real-world applications and interviews. I highly recommend it to anyone beginning their data science journey.

▶ **Meenakshi** ▶
Fullstack development

I began my web development journey with Entri's Full Stack Development course, where I gained hands-on experience in building projects using the MERN stack. The mentor support was instrumental in strengthening my technical skills, from backend development with Node.js and MongoDB to creating responsive frontends with React. Along with technical expertise, the program also helped me develop soft skills and build confidence, preparing me for real-world opportunities as a full stack developer.

Software Testing

The course was well-structured, with clearly defined topics that made learning smooth and effective. I particularly appreciated the module-end assignments, projects and mock interviews, which greatly helped reinforce the concepts through practical application. Our mentors were very supportive, always ready to clarify doubts and guide us whenever needed. I would definitely recommend this course to others interested in software testing

Data Science and Machine Learning

Joining the DSML course by Entri Elevate was truly life-changing. I enrolled while expecting my baby, and balancing pregnancy, delivery, and a new born with learning wasn't easy. But the supportive environment kept me going. Anwar Rajeev Sir's sessions were a highlight, clear, patient, and engaging. He made complex topics simple, even for someone new to coding.

The soft skills sessions were equally transformative, helping me grow in confidence and rediscover my inner strength as a learner and a mother. This course gave me more than just skills, it gave me resilience, hope, and a supportive community.

▶ **Sujith Surendra M K** ▶
AWS Solutions Architect

My name is Sujith Surendran, and I am currently working as an IT Network Support Engineer. I joined this course with the intention of learning a new technology, particularly in cloud computing, given its strong career prospects. The sessions have been going smoothly. Our mentor, Jayan Sir, is doing an excellent job in both teaching and offering support even after the sessions. The course coordinator, Praveena, has also been very helpful and supportive from the beginning of the enrollment process. She regularly collects feedback and assists in all aspects of the training. Overall, I am happy with how the training is progressing and appreciate the efforts of both the mentor and the coordinator.
