

# Associate Analyst – Job Description

## Work you'll do

Associate Analysts are expected to develop strong skills in the system/technology/area they will be working in. As a part of the onboarding process on projects, you will be provided with training/awareness aimed at building proficiency in the role. It involves the development of technical and behavioral skills as per defined proficiency levels (as per the Expectation Framework), understanding of the organization-specific tools and methodologies, and focused capability building on communication excellence.

## Your responsibilities may include:

- Working on projects of moderately complex scope, handling incident response support, troubleshooting, and problem-solving
- Help simplifying technical issues for clients as part of operations, reporting on common sources of such issues, and making recommendations to them accordingly
- Communicating some of the key findings to project team leader and extended project network (as applicable)
- Working towards improvisation and monitoring - help providing better value to the customer.
